

## Automatic Numbering Machine Model B6K

The numbering stamp model B6K has proven its worth in normal office applications. In spite of its user-friendly weight, this pagination stamp contains perfectly precise technology for best stamp imprints in sequential numbering.

The housing and wheels are not made of plastic, but are manufactured in the highest quality from die-cast zinc. This makes the numbering stamp model B6K particularly stable and durable. All parts are also produced and assembled "Made in Germany" - for the best quality, value and durability.

### Special features

- for light office applications
- lightweight, fast, reliable
- exact positioning of imprint due to line indicator at base plate
- integrated self-inking mechanism with Ink-Cartridge (Colorbox Size 2)
